## Champions for Change

*Representative  
Steven Becker*

"In our criminal justice system there is no standard of proof of absolute certainty. How can we have the absolute certainty of death when we don't require the absolute certainty of guilt?" ~Steven Becker

"Having this discussion allows us to consider how we can best provide justice for some of the most heinous acts in our society. Not only do death penalty cases take longer and require more hurdles for families to go through, they cost half a million dollars, or 70 percent more, to try than a non-death penalty case. Wouldn't that money be better spent on cold case files or violence prevention?" ~Carolyn McGinn

*Senator  
Carolyn McGinn*
